Of the ECLIPSES this Year 1692.

THere will be Five Eclipses this Year, viz: three of the Sun, and two of the Moon.

The first will be a total Eclipse of the Moon on January the 23 day, about two a'clock in the afternoon, in the 14 deg: of Leo, invisible to us. The second will be of the Sun, on February the 9. about 4 a'clock in the morning, in 29 deg: of *Aquarius* invisible to us. The third will be of the Moon, in the 6 deg: of *Aquarius*, on the 18th of July, as followeth,

Days h. "

Apparent time of true Opposition; July 13 3 10 21 morning

Eclipses begins 18 2 39 03

Greatest Obscuration. 18 3 15 27

Eclipses ends at

Edinburgh, 18 4 51 49

Eclipse, 10 dig. 1

2

The fourth will be a small Eclipse of the Sun on the second day of *August*, about halften a'clock in the forenoon; in the 20 degree of his own house *Leo*: which *Astrologers* say, betokneth no good to those persons or places under *Leo*. This Eclipse will be visible to us if well observed. The fifth and last Eclipse is of the Sun, December 27th about 2 afternoon; being very small, and scarcely to be seen of us.

A& Parl. July 22. 1690. The Term of Whitesunday to be on the 10 of May in all time coming, And Martinmas 11 of Novem.

The four Seasons of this Year 1692, with their General Dispositions.

THE Spring begins on Wednesday, the ninth of March, when the Sun entereth into the Equinoctial sign *Aries*, making both day and night equal: which Season will be most part windy.

Astrological calculations say, Summer begins on Friday, the 10 day of *June*, for the Sun entereth into the highest degree of the Northern Tropick sign *Cancer*, and then is our longest day and shortest night. This season seems to be hot, with Rains and Thunder.

Autum or Harvest, called the fall of the leaf, beginneth Monday the 12 of September, the Sun entering into the second Equinoctial sign *Libra*: and maketh again the day and night of equal length. This season seems to be unconstant.

Winter quarter begins on Saturday, the 11 of December, the Sun entering into the first degree of the Hiemal sign *Capricorn*, making to us the shortest day and the longest night.

The four Termly Quarters this Year.

First Termly Quarter is *Candlemas Day*, being on Tuesday, the 2d of February.

The second Quarter begins on Sunday, May first, the Vulgar reckoning from May 3d, called *Rood day*.

The Third Quarter begins on Munday, the 1 of August, called *Lambmas day*.

The Fourth and last Termly Quarter begins on Tuesday, November 1, which is called *Hallow-day*.

Advertisement, There are Printed and to be sold by *Jobs Reid*, The Ten Commandments, with the Lords Prayer, and the Creed, all on a large big Letter, on Lombard Paper, at 7 s per piece, having Cuts. To be had at his Printing-House in *Bells Wynd*, With all sorts of Pamphlets and Ballads for *Chapmen-Merchants*.

A Tide Table for Leith, Corrected by James Paterson Mathematician.

Shewing the Hour and Minut of high water at Leith for every day of the Moons Age, Increasing or Decreasing.

The Use. Seek the Moons Age in the first and second Column of the Table, and in the two last Columns you have the true time of full Sea at Leith.

Example. To find the full Sea the 6 day of May, 1692, I find the Moons Age by the following Table to be 1, which I find in the second Column of this Table, and against it in the last column I find 3 Hour, 3 Minuts, the true time of full Sea required.

The DIARY, Or Broadside Almanack, with the Signs and Planets in their proper places for each day of the Year, it is divided in 12 Pages for the 12 Months, 2 Columns in each Page, The 1 for the Dayes of the Month, The 2 the days of the Week, after the 7 first Letters of the Alphabet, C B being the Dominical or Sundays Letter for 1692, 10 C for Munday, D Tuesday, E Wednesday, F Thursday, G Friday, A Saturday, The 3 the Remarkable Dayes, Aspests and Weather, 1 the 4 the Suns Rising, The 5 his place, The 6 the Moons place, The 7 her Age, The 8 the days of the Month, according to the New-Style, or Gregorian Account, which is now furnished by Mr. Peterfon Mathematician, my Author, who exactly describes the Weather, with all belonging to Prognostications, To be sold by John Redd, at his Printing-House in Bells Wynd. With the High-ways of Scotland.

*An Alphabetical Prophecie found in Dublin, in the
year 1689, kept secret then, because of the height
of Popery. Shewing what should fall out in 1692.*

THese Letters five P. R. J. W. and L.
Together strive which of them shall prevail,
P. claims pre eminencie over R. J. L. and W.
For I. and R. makes all the World ado:
P. pull'd down shall be: but R. shall rise,
J. L. shall fall, and W. shall gain the prize;
A. ante M. shall then hold E. his staff,
And keep at under S. G. J. and F.
D. then shall dance, and G. shall glorifie,
And B. shall boast of this great Victorie;
N. after all recover shall the day,
And O. his Banner valiantly display;
No wapon traund 'gainst Z. prosper shall,
The other Nations they keep under shall.
Therefore, good People strive, yea, strive I say,
For that Above, which never will decay.

Note, All Letters here, except Z. and W.
Are those the *Irish* Characters allow,
And when they do admit them with the rest,
Then may the Land again be at the best.

For the Readers better understanding the Author has
set down the Denotation of these Letters.

P. Popery, R. Reformed Religion, J. James, L.
Lepers, W. William, I. and R. in the fourth line, I.
terest and Religion, A. ante M. Anti-Monarchy, or
State Government, E. Europe, S. Spain, T. Turkey,
C. Chain of Tartery, F. France, D. Denmark, G.
Germany, B. Britain, N. Norway, O. Orange, Z.
Zion of GOD.
